भारतीय प्रौद्योगिकी संस्थान जोधपुर

Indian Institute of Technology Jodhpur

Concept Note
for
MSc Digital Humanities

School of Liberal Arts (SoLA)
Indian Institute of Technology Jodhpur

1. CONTEXT

Introduction

Master of Science (M.Sc.) in Digital Humanities at IIT Jodhpur is designed to address developments, implications, and inflections of digital technologies on historical and contemporary culture, and society. To contextualize, disciplinary evolutions of the natural sciences, social sciences, the arts and humanities and allied technologies have converged and diverged over the centuries. The digital scholarship in the social sciences, the arts and humanities are only emerging. One reason for the growth of digitization in the social sciences, the arts and humanities are not an emulation of the natural sciences, rather, discovering meaning in the application of information technology as an aid to fulfil the disciplines' basic tasks of preserving, reconstructing, transmitting, and interpreting the human record historically and contemporaneously.

Given the above, the primary objective of this program is to orient students in the ways in which the study of the humanities, social sciences, and similar areas has been transformed by the influence of digital technologies and economic compulsions. This confluence of disciplines has redefined the contours of the subject of "humanities". In the present context, a critical interrogation into the history of digital approaches to the humanities, modes of implementation of digital tools & platforms, issues related to the utilization of big data (through database construction, text markup, informatics, statistical analysis to name a few) are imperatives in contemporary research in Humanities. This interdisciplinary M.Sc program has been tailored to provide such critical insights into the key parameters that are continually influencing and impacting the amalgamation of diverse disciplines, especially digital technologies with humanities that will re-engineer emerging societal structures and behavior.

Eligibility

- Three Year/ Four Year Under-Graduate Degree with a First class in any of the following subjects: Social Sciences, Humanities, Basic Sciences, Management and Engineering

Non-Graded (NG) Course and Thesis

- As per the guidelines, students will undertake a 2-credit Non-Graded (NG) course on Industry-Academia Summer Internship.
- Students will undertake their thesis in the 3rd Semester, with the work continuing into the 4th Semester.

Course Level

- Students may opt for the required number of Programme Electives from the approved list of Programme Electives
- Students may also opt for either 600-level or 700-level courses as Open Electives.

2. OBJECTIVES

M.Sc. Digital Humanities program offers unique opportunities to redraw conventional disciplinary boundaries among the humanities, the social sciences, the arts, technology and

engineering, and the natural sciences. Primary objectives of the program include (but are not limited to):

1. Exploring contested definitions of the digital humanities
2. Exploring debates about the digital humanities within the emerging field
3. Beginning to consider why the digital humanities matter beyond the academic field itself
4. Through hands-on experimentation, trying out various types of digital humanities analysis using heterogeneous datasets, tools, and methods

The students of the program will acquire a systematic understanding of digital humanities and the knowledge and skills to independently formulate and solve problems in the area of digital humanities which has large scale applications in industry and academia. After completion of the program, students will have acquired knowledge that is required for advanced work in jobs and organizations invested in digitization and the communication of information, documents, and culture. To enhance collaborative workflows, the program will actively involve academics and resource people from other institutes and universities across the country and abroad.

Expected Graduate Attributes

After completing this program, a student will be able to develop an ability to:

1. In depth understanding of the fundamental concepts of broad areas in Humanities, Social Sciences, and application areas of basic computational tools.
2. Ability to undertake problems in multidisciplinary domains of Humanities, Social Sciences, Computer Sciences, Mathematics, and related disciplines.
3. Skills to demonstrate basic principles of Humanities and Social Sciences in digital domains through various application areas and analytical processes.
4. Ability to make effective oral and written technical communication.
5. Appreciation and adherence to norms of professional ethics.

Learning Outcomes

The student will have the ability to:
1. Demonstrate knowledge and understanding of the main field of study and significant in-depth knowledge in some subcategories of the digital humanities
2. Analyze, assess, and manage complex phenomena, questions, and situations related to the digital humanities as a field of study and work
3. Describe the prospects and limitations of science and technology in digital humanities, their role in society, and the individual's responsibility for how they are used

Major Thrust Areas of the M.Sc. Program

The major thrust areas of the M.Sc. DH program are:
- Archiving
- Cultural Heritage and Digital Preservation
- Digital Pedagogy
- Digital Textual Analysis and Computational Literary Studies
- Digital Publishing
- New Media Studies

3. DESIGN of THE CURRICULUM

Serial No.	Semester	Course Category	Credit	Total Credit
1	I	Programme Compulsory (PC)	18	20
2		Lab (PC)	2	
3	II	Programme Compulsory (PC)	18	21
4		Lab (PC)	3	
5	Summer	Internship (NG)	2	2
6	III	Programme Elective (PE)	6	15
7		Open Elective (OE)	3	
8		Thesis	6	
9	IV	Programme Elective (PE)	6	15
10		Open Elective (OE)	3	
11		Thesis	6	
Total				**73**

Credit Distribution

Sl No	Particular	Total Credit
1	Programme Compulsory (PC)	41
2	Programme Elective (PE)	12
3	Open Elective (OE)	6
4	Thesis	12
5	NG	2
Total		**73**

4. PROGRAMME STRUCTURE

Semester-I				
Type	**Level**	**Name**	**LTP**	**Credit**
PC	600	Foundations of Digital Humanities	3-0-0	3
PC	600	Place and Identity in the Digital Age	3-0-0	3
PC	600	Perspectives in Language and Literary Studies	3-0-0	3
PC	600	Civilizations, Cultures, and Technologies	3-0-0	3
PC	600	Digital Economics	3-0-0	3
PC	600	Contemporary Debates in DH	3-0-0	3
PC	600	Statistics Lab	0-0-4	2
Total Credit				**20**

Semester-II				
Type	**Level**	**Name**	**LTP**	**Credit**
PC	600	Methods and Methodologies in Digital Humanities	3-0-0	3
PC	600	AI and ML for Social Sciences & Humanities	3-0-0	3
PC	600	Digital Publishing	3-0-0	3
PC	600	New Media Studies	3-0-0	3
PC	600	Archiving and Databases	3-0-0	3
PC	600	Analysis of Social Media Networks	3-0-0	3
PC	600	Archiving and Publishing Lab	0-0-4	2
PC	600	AI & ML Lab	0-0-2	1
Total Credit				**21**

Summer				
Type	**Level**	**Name**	**LTP**	**Credit**
NG	NG	Internship		2
Total Credit				**2**

Semester-III				
Type	**Level**	**Name**	**LTP**	**Credit**
PE	600/700	Programme Elective-1	(3-0-0)	3
PE	600/700	Programme Elective-2	(3-0-0)	3
OE	600/700	Open Elective-1	(3-0-0)	3
T	700	Thesis	(0-0-6)	6
Total Credit				**15**

Semester-IV				
Type	**Level**	**Name**	**LTP**	**Credit**
PE	600/700	Programme Elective-3	(3-0-0)	3
PE	600/700	Programme Elective-4	(3-0-0)	3
OE	600/700	Open Elective-2	(3-0-0)	3
T	700	Thesis	(0-0-6)	6
Total Credit				**15**

5. LIST OF PROGRAMME ELECTIVES

Sl No	Level	Course name	LTP	Credit
1	700	Digital Cinema	3-0-0	3
2	700	Digital Storytelling	3-0-0	3

3	700	Human Factors in Interaction Design	3-0-0	3
4	700	Time and Literary Narratives	3-0-0	3
5	700	Images, Imaginations, and Digital Cultures	3-0-0	3
6	700	Masculinities in the Global South	3-0-0	3
7	700	Cultural Studies	3-0-0	3
8	700	Sentence Structure	3-0-0	3
9	700	Mobile Application Design	3-0-0	3
10	700	Gendered Politics of Place and Identity in India's Digitized Northeast	3-0-0	3
11	700	Arts and Aesthetics	3-0-0	3
12	700	Modern Indian Theatre	3-0-0	3

6. Detailed Course Content of Program Core Courses

Title	**AI & ML for Social Sciences & Humanities**	Number	LAL6xxx
Department	SoLA	Structure L-T-P	3-0-0 (3 credits)
Offered for	M. Sc. CSS, M. Sc. DH	Type	Core
Prerequisite	Statistics Lab		

Objectives:

1.To make social science and humanities students conversant in AI & ML concepts and basic programming

2. To introduce AI based applications that will help students in research and jobs

3. To introduce students to critical perspectives on AI

Learning Outcomes:

1. Demonstrate knowledge of AI & ML concepts and programming for use in Social Sciences and Humanities
2. Use of select AI applications for professional purposes
3. Evaluate AI critically and demonstrate knowledge on ethical use of AI

Contents:

Knowing the AI ecosystem: What is intelligence; Defining Artificial Intelligence; Evolution of AI, Importance of AI today; Different areas of AI and where it can be used by social scientists; AI & Policy: India AI mission; Case *Study* (3 lectures)

Machine Learning concepts and types: Theory behind machine learning and understanding terminologies; From Data to Model: Exploring approaches to ML; Mathematics and CS in Machine Learning; Supervised learning and its working; Unsupervised learning and reinforcement learning; *Case Studies: Real-world applications (13 lectures)*

Deep Learning and Generative AI: An introduction to deep learning; What are LLMs; Understanding Generative AI; Prompt engineering for social science and humanities tasks; AI for academic reading and writing; AI in qualitative and quantitative research Case Study (10 lectures)

Critical Perspectives on AI: The narrative construction of AI; Data and AI; Bias and AI; Emotions and AI; Belongingness and AI (13 lectures)

Title	**AI & ML Lab**	Number	LAP6xxx
Department	SoLA	Structure L-T-P	0-0-2 (1 credit)
Offered for	M. Sc. CSS, M. Sc. DH	Type	Core for MSc and Elective for Others
Prerequisite	None		

Objectives:

1. To develop programming and logic skills in students
2. To be conversant in Python programming and use it for different applications

Learning Outcomes:

1. Develop programming logic and think in terms of flowcharts and algorithms
2. Demonstrate skills and knowledge in Python programming

Contents:

The lab component includes the following hands-on exercises (10 sessions)

- Installing and running Python
- Understanding variables and data types
- User input and basic operations
- Conditional statements
- Loops, lists and functions
- Working with files
- Error handling and debugging
- Data analysis with Python (introduction to pandas);
- Text analysis and sentiment analysis
- Web scraping
- Python and automation for researchers
- Python for research workflows

Textbook:

Title	**Analysis of Social Media Networks**	Course No.	LAL6XXX
Department/IDRP	SoLA	Structure (L-T-P [C])	3-0-0 [3]
Offered for	Ph.D. (Cr>=0); M.Sc. (Cr >=30); M.Tech. (Cr>=0); B.Tech. (Cr>=100)	Type	Core for MSc DH and Elective for Others
Prerequisite	None	Antirequisite	Social Networks, Social Network Analysis

Objectives

1. The course introduces social network analysis, its mathematical foundations and tools.
2. Students will be introduced to different types of online networks and how to use them to answer social, economic, and other queries.

Learning Outcomes

1. Students will be able to acquire social media data, formulate a hypothesis, and find answers from network data.

Contents

Introduction: Overview and Aspects of Networks, Ego Network, Characteristics of Social Networks. (2 Lectures)

Mathematical Foundation for Social Network Analysis: Matrices (operations & interpretations), Graphs (spanning tree, traversal). (5 Lectures)

Network Data: Sources, Sampling and bounding, Ethical considerations, and Collection Techniques. (4 Lectures)

Network Data Management: Data format, Import, Cleaning, Transformation, Export, Visualization (4 Lectures)

Information Diffusion Analysis: Centrality and Network Value, Influence, Epidemics Modeling (4 Lectures)

Clustering and Grouping: Community detection, election campaign analysis. (3 Lectures)

Networks in Their Surrounding Contexts: Homophily, Affiliation, Behaviour Modeling (3 Lectures)

Markets and Strategic Interaction in Networks: Network Models of Markets, Bargaining and Power in Networks, Sponsored Search Markets, Network Effects and Economy (5 Lectures)

Voting: Group Decision-Making, Information Aggregation (3 Lectures)

Case Studies: Wiki Networks, YouTube, Flickr, Twitter, Facebook, Email Communication Networks, Thread Networks (6 Lectures)

Textbooks

1. David Easley and Jon Kleinberg (2013), Networks, Crowds, and Markets: Reasoning About a Highly Connected World, Cambridge University Press.
2. S. Borgatti, M. Everett and J.C. Johnson (2013), Analyzing Social Networks, Sage.
3. Derek L. Hansen, Ben Shneiderman and Marc A (2011), Analyzing Social Media Networks with NodeXL, Morgan Kaufmann

Reference Material

1. Albert-Laszlo Barabasi (2016), Network Science, Cambridge University Press.
2. Mark Newman (2018), Networks, Oxford University Press
3. Wouter de Nooy, Andrej Mrvar, Vladimir Batagelj (2018), Exploratory Social Network Analysis with Pajek, Cambridge University Press

Self-Learning Material

1. Complex Networks, https://www.barabasilab.com/course
2. NPTEL Lecture, Social Networks https://nptel.ac.in/courses/106106169/#

Course Title	**Archiving and Databases**	Course No.	LAL6xxx
Department	SoLA	Structure (L-T-P-D [C])	3-0-0[3]
Offered for	M.Sc. (Cr >=30); M.Tech. (Cr>=0); B.Tech. (Cr>=100)	Type	Core for MSc DH and Elective for Others
Prerequisite	None		

Objectives

1. Developing an understanding of the archive and its evolution in historical time till the days of the digital revolution
2. Exploring digital cinema and media, audio-visual essay, media collectives, and digital film archives
3. Tracing the trajectory of older information systems till the advent of the database with select case studies of the latter

Learning Outcomes

1. Develop greater familiarity with the philosophical and historical nuances of the archive
2. Become acquainted with the contemporary forms of digital archive, artwork, cinema, works of media collectives and their modes of exhibition
3. Understand database as an emerging mode of information network

Contents

Archive and Its Evolution: Introducing archive, Archive in historical time, politics and poetics of archiving, archive in the digital age (10 lectures)

***Cinema and The Archive*:** Film archives, digital age and post-cinema, the end/future of celluloid (10 lectures)

Contemporary Art and The Emergent Space: Archive, art museums, installation art, audio- visual essay, media collectives and their practices, digital archive, case studies of digital film archiving initiatives, film databases (10 lectures)

Exhibition and Authorship: modes of exhibition and questions concerning authorship, piracy, law and the image (9 lectures)

Textbooks

1. Friedrich, M., (2018), *The Birth of the Archive: A History of Knowledge*, University of Michigan Press.
2. Ernst, W., (2013), *Digital Memory and the Archive*, University of Minnesota Press.
3. Grau, O., Coones, W., and Ruhse, V., (eds.) (2017), *Museum and Archive on the Move: Changing Cultural Institutions in the Digital Era*, De Gruyter.

Self-Learning Material

1. Indian Cinema, https://indiancine.ma/

Course Title	**Archiving and Publishing Lab**	Course No.	LAP 6xxx
Department	SoLA	Structure (L-T-P) [C])	0-0-4[2]
Offered for	M.Sc. (Cr >=30); M.Tech. (Cr>=0); B.Tech. (Cr>=100)	Type	Core for MSc DH and Elective for Others
Prerequisite	None		

Objectives

1. Introduce the necessary tools and techniques to understand various DH archiving research projects
2. Tracing the trajectory of older information systems till the advent of the database with select case studies of the latter
3. Introduce the tools and skills of digital publishing

Learning Outcomes

1. Learn to apply tools for the collection and analysis of data for digital archiving
2. Understand database as an emerging mode of information network
3. Learn how to use digital publishing tools
4. Develop the skills of the digital publishing profession

Contents

1. **Introduction to Archiving and Preservation Tools** like TEI, Digital Mappa, Omeka, GitHub, eXistdb (10 sessions)
2. **Online publishing platforms**: Tumblr multimedia publishing platforms: Scalar, Omeka, Pressbooks; Open Journal System, and Open Monograph Press; markup languages: XML, HTML, SGML, and GML; EPUB and ereaders (10 sessions)

Online Material

1. Indian Cinema, https://indiancine.ma/
2. Digital preservation tools and systems: https://www.nationalarchives.gov.uk/archives-sector/advice-and-guidance/managing-your-collection/preserving-digital-collections/digital-preservation-tools-systems/
3. Tools for Archiving, Databasing and Exhibiting: https://dcch.leeds.ac.uk/training-and-support/tools-for-digital-research/tools-for-archiving-and-exhibiting/
4. Tools: https://www.dpconline.org/handbook/technical-solutions-and-tools/tools
5. Digital Platforms & Tools: https://www.stateofdigitalpublishing.com/digital-platform-tools/
6. Digital Publishing 101 at https://digitalpublishing101.com/learn/digital-publishing-101-for-ebooks/

7. Digital Marketing 101 at https://digitalpublishing101.com/learn/digital-marketing-101-for-ebooks/

Course Title	**Civilizations, Cultures, and Technologies**	Course No.	LAL6xxx
Department	SoLA	Structure (L-T-P) [C])	3-0-0[3]
Offered for	M.Sc. (Cr>=0); M.Tech. (Cr >= 0); B.Tech. (Cr>=75)	Type	Core for MSc DH and Elective for Others
Prerequisite		None	

Objectives

1. This course introduces students to important historical and sociocultural processes that have crafted technologies over time and across civilizations.
2. Recognize how technological developments are related to socio-cultural values and practices and understand the roots of current technological society(ies)

Learning Outcomes

1. Students will be able to appreciate that technology is not an isolated, literate enterprise, it rather produces structures, machines, processes, systems that impact and inflect societies and civilizations

Contents

History of Civilizations and role of technology: Classical and Early Modern Philosophy (3 lectures); Narrative(s) of Progress; Industrial Revolution(s) (5 lectures)
Industry and Innovation; Culture of Invention; Enlightenment and the Rise of Modern Science (5 lectures)
Social Construction of Technology - Colonial Technology (Race, Gender, Sciences and Technology) (5 lectures); Communication, Transportation and the changing world (4 lectures); Diffusion of Technologies and transfer of technology globally (4 lectures)
The Development of the Computer Industry; Rise of the Internet and Digital Society; Industrialization, Commodification and the Environment (5 lectures); Biotechnology (3 lectures)
Future of Science and Technology in the society and their changing relationship (5 lectures)

Textbooks

1. Pacey, Arnold. *Technology in World Civilization*, 4th ed. Cambridge, MA: MIT Press, 2001.
2. Volti, Rudi, *Society and Technological Change*, 4th ed. New York: Worth

Self-Learning Material

1. Digital Humanities Seminar Video Archive of the Open University, UK, http://www.open.ac.uk/arts/research/digital-humanities/videos

Title	**Contemporary Debates in Digital Humanities**	Course No.	LAL6XXX
Department	SoLA	L-T-P [C]	3-0-0
Offered for	M.Sc. (Cr >=30); M.Tech. (Cr>=0); B.Tech. (Cr>=100)	Type	Core for MSc DH and Elective for Others
Prerequisite	None		

Objectives:

1.To introduce the contemporary debates in Digital Humanities and generate discussions.

2. To introduce different methods, tools in DH and discuss some of the existing DH projects through case studies

Learning Outcomes:

1. To understand the contemporary debates in the field of Digital Humanities

2.To get an introduction to different methods and tools used in Digital Humanities

3. To familiarise with the nature of projects done in the field

Contents:

Introduction to Digital Humanities as a discipline- definitions; history and key debates, building vs critiquing, transformation of humanities depts. Methods- introduction to methods like distant reading, sentimental analysis, text encoding initiative (TEI). Debates- digital art and creativity, copyright debates; digital archiving and questions of digital access; multilingual datasets and engagement with datasets; critique and/in DH; gender in digital spaces; game studies. (14 sessions)

The Computational Literary Studies (CLS) Debate: Computational case against computational literary studies; validity and interpretability of computational literary analysis, methodological critiques within DH and CLS (12 sessions)

Digital Humanities in India- key concerns and debates- South Asian and Global South DH, minimal computing, questions of access in India; digital archive; emergence of GLAM (Galleries, Libraries, Archives and Museum) sector; cultural history and data visualisation; mediated classrooms and education; language mapping and preservation; digital public memory, environmental impact of DH, select case studies. (13 sessions)

Title	**Digital Publishing**	Number	LAL6XXX
Department	SoLA	L-T-P [C]	3-0-0[3]
Offered for	M.Sc. (Cr >=30); M.Tech. (Cr>=0); B.Tech. (Cr>=100)	Type	Core for MSc DH and Elective for Others
Prerequisite	None		

Objectives
The instructor will:
1. Provide an overview of digital publishing paying attention to its historical development, marketability, technological innovation, legality, and ethicality
2. Train the students with the practical skills and technological knowledge required to enter this industry

Learning Outcomes
Students are expected to have the ability to:
1. Become techno literates who have acquired a digital publishing vocabulary, can design its products, and are aware of its legal and ethical aspects

Contents
Part 1: Overview of Digital Publishing (Editorial Content Development and Management)
Introduction to digital publishing and its workflow: Concepts of digital, online, virtual, and electronic; methods and tools of digital publishing: principles of multiplatform publishing; digital vocabulary and language skills: copyediting, proofreading, and typography-LaTeX (13 lectures)

Part 2: Economics of Digital Publishing Business models and ecommerce; digital marketing, products of publishing, and sales and pricing; new consumers in the network economy: market sensing and market relating; types of marketing network: Internal, vertical, intermarket, and opportunity (13 lectures)
Part 3: Ethicolegal Issues in Digital Publishing
Law, IPR, and copyright; plagiarism, legacy, and ethics in digital publishing; content creation, management, and dissemination; Ethicolegal aspects of digital repositories, digital content design and development, and digital preservation/archiving (13 lectures)

Course Title	**Foundations of Digital Humanities**	Course No.	LAL6xxx
Department	SoLA	Structure (L-T-P- D [C])	3-0-0[3]
Offered for	M.Sc. (Cr >=30); M.Tech. (Cr>=0); B.Tech. (Cr>=100)	Type	Core for MSc DH and Elective for Others
Prerequisite	None		

Objectives

1. Explain the broad spectrum and perspectives of Digital Humanities (DH)
2. Introduce the necessary tools and techniques to understand various DH research projects

Learning Outcomes

1. Understand the transdisciplinary nature of DH
2. Learn to apply tools for the collection and analysis of data from digital platforms
3. Understand the basic ethics of data collection from digital platforms

Contents

***Introduction and History of DH*:** Intersection of digital technology and humanities disciplines; the history of humanities computing – how and why it emerged (6 lectures)
Digitization of the Humanities: Theoretical Premises; Data in DH, Images and other visual cultures (7 lectures)
Usages of digitizations*:* Archiving and Databases; Mapping; role of place and space in cultural visibility; digital heritage (7 lectures)
Data Collection*:* New Media and Digital Platform, Meta Data, Social Media Data, Data Curation, Structured and Unstructured Data (10 lectures)
Ethics in Digital Environments: Copyright, Digital Rights, Open Access and Digital Knowledge Spaces (4 lectures)
Introduction to Digital Tools: TAGS, twXplorer, ngram Viewer, AntConc, StoryMap, Voyant (5 lectures)

Textbooks

1. Eileen Gardiner, Ronald G. Musto (2015), The Digital Humanities: A Primer for Students and Scholars, Cambridge University Press.
2. Chaudhuri, S. (2010), The Metaphysics of Text, Cambridge University Press
3. Gold, Matthew K. (2012), Debates in the Digital Humanities, University of Minnesota Press

Reference Books

2. Schreibman, S., Siemens, R., Unsworth, J. (2004), Companion to Digital Humanities, Oxford: Blackwell.
3. Shillingsburg, Peter. (2006), From Gutenberg to Google. Electronic Representations of Literary Texts, Cambridge University Press

Course Title	**Methods and Methodologies in Digital Humanities**	Course No.	LAL6xxx
Department	SoLA	Structure (L-T-P [C])	3-0-0 [3]

Offered for	M.Sc. (Cr >=30); M.Tech. (Cr>=0); B.Tech. (Cr>=100)	Type	Core for MSc DH and Elective for Others
Prerequisite	None		

Objectives

1. Demonstrate in depth knowledge of selected methodologies related to DH
2. Introduce and explore avenues of new and emerging societal and cultural entities in DH
3. Introduce several qualitative and quantitative tools for DH projects

Learning Outcomes

1. Understand DH as a convergent array of practices.
2. Understand what DH means in different contexts
3. Capture, collect, and analyse a variety of data types related to DH project

Contents

DH as Convergent Practices: Digital methods in and about philosophy, society, culture, and language (5 Lectures)
DH in Context and Approaches (Theory and Methods): Versions of DH across the globe, Post-colonial DH, DH in the Global South (5 lectures)
***Methodologies*:** Constructing Research Questions for a variety of disciplinary contexts (for e.g. in new media, social studies, mass communication and journalism, digital heritage) (7 lectures)
Offline and Online Data Collection: Surveys, Interviews, Focus Groups, Scraping (6 Lectures)
Qualitative Methods*:* Descriptive, Topic and Thematic Coding, Data analysis through NVivo and MaxQDA; (10 Lectures)
Quantitative Methods: Introduction to statistical techniques, and using of statistical tools (SPSS, STATA); Network Analysis (6 lectures)

Textbooks

1. Patricia Leavy (2017), Research design: Quantitative, qualitative, mixed methods, arts-based, and community-based participatory research approaches. Guilford Publications

Course Title	**New Media Studies**	Course No.	LAL6XXX
Department	SoLA	Structure (L-T-P [C])	3-0-0[3]
Offered for	M.Sc. (Cr >=30); M.Tech. (Cr>=0); B.Tech. (Cr>=100)	Type	Core for MSc DH and Elective for Others
Prerequisite	None		

Objectives

1. Help students in exploring the various possibilities offered by New Media and their impact on social, political and cultural domains
2. Create an understanding of concepts such as piracy, rights and the digital commons
3. Make students aware of the implications of New Media and the digital image for the public lives in India

Learning Outcomes

1. Develop a sustained interest in new media and its global politics
2. Formulate an informed acquaintance with the network society
3. Make a South Asian/Indian intervention into the field

Contents

New Media and Its Aftermath: Histories of New Media, politics of New Media, New Media research; new media study and methodologies (10 lectures)
Public Domain and The Digital Commons: Digital Commons, copyright and IP, piracy, online streaming, fan-subbing and ownership/authorship debates (10 lectures)
Network and Cyber-Culture: Cyber-culture, video games, digital image and social media, media lab as research space (10 lectures)
New Media in Indian politics: Indian media economy, New Media and its changing forms of politics and electoral behavior in India (9 lectures)

Textbooks

Course Title	**Perspectives in Language and Literary Studies**	Course No.	LAL6XXX
Departme nt	SoLA	Structure (L-T-P -D [C])	3-0-0-0 [3]
Offered for	M.Sc. (Cr>=0); M.Tech. (Cr >= 0); B.Tech. (Cr>=75)	Type	Core for MSc DH and Elective for Others
Prerequisi te	None		

Objectives

1. Introduce students to theories of literature.
2. Introduce students to basic theories of language, linguistics concepts, and literary cultures in translation.
3. Provide the students with a background in the development of computational tools for literary analysis

Learning Outcomes

1. Understand major trajectories in literary thought, trace the evolution of literary genres, and contextualize their contemporary significance.
2. Understand fundamental aspects of language and linguistic analysis.
3. Critically analyse literary texts using digital tools.

Contents

History of English Language and Literature: Literary Canon, Historical Events and Linguistic Shifts, Impact of technology on evolution of literature (5 lectures)
Literary Genres**:** The Epic, Drama, The Advent of the Novel, Poetry (5 lectures)
Literary Analysis and Criticism: Formalism, Close Reading and Textual Analysis, Structure, pattern, motif and metaphor analysis (5 lectures)
Fundamentals of Linguistics**:** Language Families, Syntax, Morphology, Phonology, Pragmatics (5 lectures)
Applied Linguistics**:** Theories of Language and Language Learning, Corpus and Discourse Analysis, Digital Tools for Language Learning and Textual Analysis (5 lectures)
Literary Cultures around the World: American Literature, World Literature, Literatures of the Commonwealth, Postcolonial and New Writing, South Asian Literatures (9 lectures) *Literature in the Digital Age*: Cyberpunk fiction, Steampunk fiction, Science fiction, Digital Humanities Tools for Literary Analysis, Discourse and Corpus Analysis with Digital Tools, Data driven Literary Analysis (5 lectures)

Textbooks

Course Title	**Place and Identity in the Digital Age**	Course No.	LAL6XXX

Department	SoLA	Structure (L-T-P-D [C])	3-0-0 [3]
Offered for	M.Sc. (Cr >=30); M.Tech. (Cr>=0); B.Tech. (Cr>=100)	Type	Core for MSc DH and Elective for Others
Prerequisite		None	

Objectives

1. To familiarize students with the intersection of what have undoubtedly become two "keywords" that transcend most social science disciplines in the digital age: place and identity.
2. Students will gain ideas of the role that place has in the formation of all types of identities – not just those of individual subjects and groups, but of regions, institutions, practices and even ecosystems.

Learning Outcomes

1. Students will learn to investigate the relationship between the production of space, practices of place, and embodied identity. The relationship between these categories has taken on a new level of importance with the emergence of digital technologies, as seen in both academic studies and in the broader cultural climate.
2. Students will learn topics that are situated at the intersection of space, place, identity, and digital technology such as mapping and power, location-aware and pervasive technologies, surveillance, virtuality, telepresence, empire in the digital age, transnational identity, and diaspora in an age of global connectivity.

Contents

Introducing Space, Place, and Identity: Defining the terms; Place vs Space; The Production of Space; Identity and Space (6 lectures)
Practices of Representation: Mapping and Pervasive Computing; Maps, Representation, and Power; Panoptic Spaces; Spaces of Economic Diversity (13 lectures)
Identity from Imagined Communities to Virtual Communities: Imaginative Geographies; The Virtual and the Actual; Liveness, Telepresence, and Embodied Connectivity (13 lectures)

Connection and Disconnection; National Identity; Transnationalism and Diaspora (7 lectures)

Textbooks

1. Massey, Doreen. *For Space*. Sage Publications, Ltd. 2005
2. Hubbard, Phil; and Kitchin, Rob. *Key Thinkers on Space and Place (Second Edition)*. Sage Publications Ltd. 2010.

Course Title	**Digital Economics**	Course No.	LAL6XXX
Department	SoLA	Structure (L-T-P-D [C])	3-0-0-0 [3]
Offered for	M.Sc. (Cr >=30); M.Tech. (Cr>=0); B.Tech. (Cr>=100)	Type	Core for MSc DH and Elective for Others
Prerequisite	None		

Objectives

1. Explain the basic theory in digital economics, including network effects, value creation models, digital business models and market modeling.
2. Introduce how the digital economy influences societies, environment, regulations, privacy, strategy, and financial operations.

Learning Outcomes

1. To get broad knowledge in digital economics and how the digital economy impacts its surroundings.
2. To perform network effect analysis of a value network and construct a business model.

Contents

Introduction: The Digital Economy, The Productivity Paradox, ICT, Growth and Productivity (6 lectures)
Network Infrastructures: Broadband Networks and the Transition to Fiber, The Relations between Network Operators in the Internet: Peering, Transit, and Net Neutrality (6 lectures)
Network Effects and Standards: Network Effects, Standard Wars (6 lectures)
The Economics of Multi-Sided Platforms, Economics of Platforms: The Basics, Reseller vs. Platform: The Choice of Business Model (6 lectures)
Digital Markets: Competition between E-retailers and Brick & Mortars, Business Models of Digital Goods Personal Data, Price Discrimination and Privacy: Personal Data and Price Discrimination, The Cost of Privacy and the Privacy Paradox (5 lectures)
Experience Goods, Online Reviews and Recommender Systems: Search Goods and Experience Goods, Online Reviews and Recommender Systems (5 lectures)
Digitization and Innovation: Intellectual Property in the ICT Sector: The Effect of Digitization on Innovation: Crowdsourcing and Crowdfunding (5 lectures)

Textbooks

1. Eric Brousseau, Nicolas Curien (2007); Internet and Digital Economics: Principles, Methods and Applications. Cambridge University Press.
2. Cellini P. (2007); Internet Economics: Understanding Digital and New Media Markets, Luiss University Press.

Course Title	**Statistics Lab**	Course No:	LAP6xxx
Department	SoLA	Structure (L-T-P)	0-0-4 [2]
Offered for	MSc and PhD	Type	Core for MSc CSS, Elective for others
Prerequisite	Nil		

Objectives

1. To build practical foundations in mathematics and statistics for social science research.
2. To train students in using R for data handling, analysis, visualization, and reporting.
3. To develop applied skills in statistical modeling and computational social science research.

Learning Outcomes

1. Students will be able to use basic mathematical and statistical tools for social science data analysis.
2. Students will be able to work with R, R packages, datasets, and reproducible analytical workflows.
3. Students will be able to apply statistical tests, regression models, and scale validation techniques to social science problems.

Contents

The laboratory component is designed around the following hands-on statistical computing exercises: (20 sessions)

Working with sets, relations, and functions using small social science datasets.
Applying set operations for classification, grouping, and filtering of data.
Representing data using vectors, matrices, and simple data tables.
Performing basic matrix operations and solving simple linear equations.
Computing distance, similarity, and projection measures.
Exploring basic optimization using objective functions and constraints.
Installing and familiarizing with R and RStudio.
Creating and managing R objects, vectors, lists, matrices, and data frames.
Installing, loading, and using core R packages for data analysis.
Importing datasets from CSV, Excel, and online sources using R.
Cleaning, transforming, recoding, and preparing datasets using R.
Handling missing values, outliers, and variable transformations using R.
Generating descriptive statistics and visualizations using R.
Simulating probability distributions using R.
Generating sampling distributions and computing confidence intervals using R.
Conducting z-test, t-tests, chi-square tests, and Fisher's exact test using R.
Conducting one-way ANOVA, two-way ANOVA, repeated measures ANOVA, post-hoc tests, and selected MANOVA examples using R.
Performing correlation, linear regression, logistic regression, and Poisson regression using R.
Checking assumptions, computing effect sizes, generating diagnostics, model summaries, and statistical tables using R.
Conducting scale construction and validation using R, including Cronbach's alpha, KMO test, Bartlett's test, PCA, EFA, and introductory CFA.

Textbooks

1. Field, A. (2026). *Discovering Statistics Using R and RStudio* (2nd ed.). SAGE.
2. Wickham, H., Çetinkaya-Rundel, M., & Grolemund, G. (2023). *R for Data Science: Import, Tidy, Transform, Visualize, and Model Data* (2nd ed.). O'Reilly.

7. Detailed Course Content of Program Electives:

Course Title	**Mobile Application Design**	Course No.	LAL7XX0
Department	SoLA	Structure (L-T-P [C])	3-0-0 [3]
Offered for	Ph.D. (Cr>=0); M.Sc. (Cr >=30); M.Tech. (Cr>=0); B.Tech. (Cr>=100)	Type	Elective
Prerequisite			

Objectives

1. Developing an understanding of the modern mobile application design framework.
2. Creation of data-driven mobile applications for various modern devices.
3. Encourage problem-solving and innovation through real-world mobile application design projects.

Learning Outcomes

1. Understand the architecture and development lifecycle of modern mobile applications.
2. Familiarity with mobile application design for data collection and analyses.
3. Utilize mobile device sensors and communication modules for context-aware applications.

Contents

Computational and Design Thinking for Mobile App Design: Concepts, Practices, Perspectives [4 lectures]

Introduction to Mobile App Design:, Native (iOS/Android) vs. Hybrid Architectures, User-Centered Design (UCD), Mobile Information Architecture. [5 lectures]

Mobile Interface Elements & Components: Principles and Tools for Mobile UI/UX Design, User Interface Layout Models, Responsive vs. Adaptive Design, State and Event Handling, Multi-resolution Support, Design Heuristics, Usability and Accessibility. [7 lectures]

Data Management, API Integration, AI Integration: Local Data Storage Mechanisms, Data Formats, RESTful and Non-RESTful Web Services, AI Integration (viz. NLP, CV, ML). [7 lectures]

Sensor Integration: Mobile Sensor Ecosystem, GPS, Accelerometer, Gyroscope, Magnetometer, Camera APIs. [4 lectures]

Prototyping, Testing & Deployment: Debugging and Profiling Mobile Applications, Performance Optimization Techniques, Building and Distributing Mobile Apps, App Store Optimization, Version Control, Continuous Integration, Understanding Deployment Fundamentals. [8 lectures]

Mobile Security, Privacy, and Ethics: Security and Trust Management in Mobile Applications, Privacy and Ethics. [4 lectures]

Required Course Deliverables

1. Assignments involving implementation of all theoretical content
2. Course Project – involving end-to-end mobile app development for a problem statement

[MIT App Inventor tool, n8n, and other minimal / non-coding interfaces may be explored for practicum]

Text Book

Course Title	**Sentence Structure**	Course No.	LAL7030	
Department	SoLA	Structure (LTPC)	3-0-0 (3 credits)	
Offered for	UG, PG and PhD	Type		Elective
Prerequisite	None			

Objectives

1. To introduce Noam Chomsky's conceptualization of human language and to show how the study of such language can contribute to understanding the human mind
2. To understand why certain combinations of words are proper sentences in languages whereas other combinations are not and also to address what mechanism is behind the grammaticality of well-formed sentences
3. To provide a helpful reference and discussions on current syntactic theory and to introduce a variety of intriguing puzzles, striking facts and novel ideas that underlie sentence structure both from data-driven and theory-oriented approaches

Learning Outcomes

1. Learning to look at language and its sentence structure from a scientific perspective and understanding what features and sub-features goes into any particular word.
2. Stating in what ways sentences are divided into constituents and what diagnostics one can use in identifying the constituents and the semantic roles associated with each arguments.
3. Working with basic syntactic tree structures involving operations like Merge, Move and Agree.

Course Content:

Introduction: The language machine, Chomsky's view on Natural Language Processing, Implications from the advent of recent AI language models (including ChatGPT), Features and sub-features of words, Syntax as science (8 lectures).

Combination of categories: Phrases and sentences as structures and hierarchies, Empirical evidence, Conceptual evidence, Operations employed by natural language grammar. (8 lectures)

Constraints on combination*:* Syntactic principles that constrain the overgeneration, Meaning of the verb, Theta theory and and its several predictions; Case as a filter on syntactic structure, Nominative case, Accusative case, clausal projections, Noun Phrase, Determiner Phrase, Complementary phrases (14 lectures)

Dependency in sentences*:* Agreement relations, Agreement as feature dependency, Person, number and gender agreement across South Asian Languages, Principle A, B and C of the Binding Theory (9 lectures)

Textbooks:

1. Koenaman, O and H Zeijlstra. 2017. *Introducing Syntax,* Cambridge: Cambridge University Press.

Title	**Gendered Politics of Place and Identity in India's Digitized Northeast**	Number	LAL7XXX
Department	SoLA	L-T-P [C]	3-0-0[3]
Offered for	Ph.D. (Cr>=0); M.Sc. (Cr >=30); M.Tech. (Cr>=0); B.Tech. (Cr>=100)	Type	Elective

Prerequisite	Desirable: DH MSc 600-level core course: Place and Identity in the Digital Age

Objectives

The instructor will:

1. Examine how the digitization in India's Northeast could be seen as an act of negotiating the political crisis in the region with reference to two keywords of place and identity. The gendered implications of these keywords are also taken into consideration.
2. Explore the various spatial processes of digitization in the context of the identitarian politics of India's Northeast: The boom of digital cinema and music videos, the popularity of different modes of self-expression through digital publishing (blogs), the emergence of digital marketspaces and virtual travel websites (especially during the pandemic), the role of online journalism, and the impact of SCM, digital education, and telemedicine

Learning Outcomes

The students are expected to have the ability to:

1. Identify and understand the digitization of India's Northeast through the political lenses of place and identity and their gendered implications
2. Explain how digitization impacts cinema, education, market economy, tourism, journalism, healthcare, and urban lives in India's Northeast

Contents

Digital cinema and digital music videos: The politics of language, linguistic nationalism, ban on Hindi cinemas (in Manipur and Mizoram), digitization of spaces of entertainment in conflict zones (6 lectures)

Digital Education: Covid and education disruption, online classes (learning and teaching), and issues of access (6 lectures)

Digital marketspaces: Network economy, Internet as the new marketspace and customer communities in conflict zones, online marketspaces versus the actual space in

an era of pandemic lockdowns, digital currencies and cybercrime in India's Northeast (6 lectures)
Travel websites: The concept of travel in a time of pandemic, virtual tourism in spaces of everyday conflict, imagined and imagining new geographies (6 lectures)
Online journalism: "Media in conflict or conflict in media", framing the conflicts, ethnic journalism, questions of censorship in a conflict-ridden digital space (6 lectures)
Telemedicine: Covid in India's Northeast, digital healthcare, politics of telemedicine (4 lectures)
Smart cities: Digital urbanism, digital infrastructure, SCM in India's Northeast (5 lectures)

Course Title	**Digital Storytelling**	Course No.	**LAL7XX0**
Department	SoLA	Structure (L-T-P[C])	3-0-0 [3]
Offered for	Ph.D. (Cr>=0); M.Sc. (Cr >=30); M.Tech. (Cr>=0); B.Tech. (Cr>=100)	Type	Elective
Prerequisite	None		

Objectives

1. Understand and examine the new tenets of storytelling in the digital age through thoughtful analysis of trends, topics, consumption and digital tools used.
2. Analyse the changing roles of storytellers for news, businesses and nonprofit organizations.
3. Increase ability to come up with big, original ideas and creatively.

Learning Outcomes

1. Develop a deeper sense of why and how we create and value stories
2. Learn about the ways digital communication technologies can expand and enhance narrative techniques
3. Develop narrative technique and the ways digital elements can interact with traditional written narratives to change the ways an audience experiences story
4. Learn how to match narrative techniques to an audience

Contents

New Technologies, Creative Opportunities: Evolution, Digital Entertainment, Convergence (5 Lectures)
Creating Story-Rich Projects: Interactivity, Character Dialogue, Emotion, Social Media, Transmedia, Project creation (10 lectures)
Harnessing Digital Storytelling for Pragmatic Goals: Teaching, Advertising, Training (7 Lectures)
Media and Models: Mobile Device and Applications, Video Games, Interactive Cinema, Interactive TV, Electronic Kiosks, Immersive Environments (12 lectures)
Digital Storytelling Tools (5 Lectures)

Text Book

1. C.H., Miller, Digital Storytelling, A Creator's Guide to Interactive Entertainment, Focal Press, 2004

Reference Books

1. Seth Gitner, (2015), Multimedia Storytelling for Digital Communicators in a Multiplatform World, Routledge Publishers.
2. Joe Lambert (2013), Digital storytelling capturing lives, creating community, Routledge Publishers.

Course Title	**Human Factors in Interaction Design**	Course No.	**LAL7XX0**
Department	SoLA	Structure (L-T-P)	3-0-0 [3]
Offered for	Ph.D. (Cr>=0); M.Sc. (Cr >=30); M.Tech. (Cr>=0); B.Tech. (Cr>=100)	Type	Elective
Prerequisite	None		

Objectives

1. Introduce the study of human-computer interaction and user interface design.
2. Explain theoretical understanding of the field and some practical UI design skills.

Learning Outcomes

1. Develop prototypes based on the interaction design principles.
2. Participate as usability testers in evaluating the designs of others.

Contents

Introduction: Definitions, Interaction Design Principles, Paradigms, Vision, Theory, Models, Frameworks (5 Lectures)
Introduction to human factors: Role of psychology, physiology in interaction design, Human Factors Perspective, Cognitive Aspects (5 Lectures)
Social and Emotional Interaction: Conversation, Remote Interaction, Co-presence, Expressive Interface, Emotion Design, Anthropomorphism (7 Lectures)
Interfaces: Types of Interface, natural Interface (5 Lectures), Multimodal, Wearables, Brain Computer Interface (5 Lectures)
Data Gathering and Analytics: Data Collection Techniques, Quantitative and Qualitative Analysis, Data at Scale (6 Lectures)
Evaluation Techniques: Types of Evaluation, Usability Testing, Analytics and A/B testing, Predictive Models (6 Lectures)

Text Book

1. Sharp, H, Y, Rogers, J, Preece, INTERACTION DESIGN beyond human-computer interaction, John Wiley & Sons (2019)

Reference Books

1. Ratner, Julie (ed); Human factors and web development; Lawrence Erlbaum Associated (2003)
2. Sanders, Mark S; McCormick, Ernest J; Human factors in engineering anddesign, McGraw Hill (1993)

4. Journal of Human Computer Interaction

Self Learning Material

1. NPTEL Lecture, https://nptel.ac.in/courses/106/103/106103220/
2. NPTEL Lecture, https://nptel.ac.in/courses/106/106/106106177/

Course Title	**Images, Imaginations, and Digital Cultures**	Course No.	**LAL7XX0**
Department	SoLA	Structure (L-T-P-D[C])	3-0-0 [3]
Offered for	Ph.D. (Cr>=0); M.Sc. (Cr >=30); M.Tech. (Cr>=0); B.Tech. (Cr>=100)	Type	Elective
Prerequisite	None		

Objectives

1. To familiarise students with the process of seeing as a social construct to explore the ways we produce, identify, understand, and consume images by studying visual materials from different historical and cultural milieu
2. To introduce students to how photography and images across time and space change visual discourse and people's lives
3. By contextualising everyday visual culture within larger social debates around power, politics, identity and resistance, this course aims to create a consciousness about the communicative power of visual images, and to equip students with interpretive tools for the evaluation of images.

Learning Outcomes

1. Students will be able to develop a sociological imagination of visual cultures and its impact on society
2. Students will be able to assemble a multi-perspective analysis of a given sociocultural issue related to images against local, global, international, and intercultural background
3. Map historical photographic concepts to current digital references.

Contents

Images, Imaginations, and Cultures- Photographs and other images as objects (of imagination) influencing cultures; Photography as a technology of the colonial state and as a transformation instrument of body politic, Race, Gender, Caste and other intersections imagined in photographs and other images; Postcards (11 lectures)
Visual Cultures: Subject-Object debate; Power, Knowledge and the Gaze (Imaging the 'Other'), Visual discourse; object-subject debate; space and visibility, Visual Cultures and Critical Theory (Foucault, Lacan, Derrida, Barthes) (8 lectures)
Images as Performative Space*:* Power, Knowledge and the 'Gaze' determining photographs and their power, Imaging the 'Other': Orientalism; class construction through photography (11 lectures)
Images and Mobilities: Maps and transportation representing physical, social and imaginative worlds (5 lectures)
Digital ethnography: *The future of Images*; Images and the digital revolution - the road ahead (4 lectures)

Reference Books

1. Karlekar, Malavika., (2013), *Visual Histories: Photography in the Popular Imagination*, Oxford University Press
2. Chaudhary, Zahid R., (2012), *Afterimage of Empire: Photography in Nineteenth- Century India*, University of Minnesota Press

Course Title	**Cultural Studies**	Course No.	**LAL7XX0**
Department	SoLA	Structure (L-T-P-D [C])	3-0-0 [3]
Offered for	Ph.D. (Cr>=0); M.Sc. (Cr >=30); M.Tech. (Cr>=0); B.Tech. (Cr>=100)	Type	Elective
Prerequisite	None		

Objectives

1. Teach cultural studies as an interdisciplinary field which draws from and contributes to literature, media studies, cultural anthropology, and sociology amongst other disciplines.
2. Equip students with methods and frameworks to look at the central preoccupations of the field – identity, power, economy, culture, aesthetics, and social institutions.
3. Critically interrogate the benefits of cultural studies for both inter- and intra-disciplinary work.

Learning Outcomes

1. Understand major theories relating to historical and emergent ideas of culture and social thought.
2. Investigate processes of cultural production, consumption, and preservation using conceptual tools from the field of cultural studies.
3. Contextualize the role, applications, and significance of culture in the digital age.

Contents

Culture in the 19th and 20th centuries*:* The Emergence of the Culture Concept, Evolution of Culture, Culture and the Industrial Revolution, The Culture Industry (Value and Meaning), Culture as Commodity (Mass Culture) (9 lectures)

Culture and Politics: Aesthetics and Politics, National Culture, Cultural Semiotics and Political Life, Cultural Economy, Political Society (9 lectures)

Culture and Pedagogy*:* Culture and the Disciplines - Literary Studies, Anthropology, Sociology, History, Linguistics/Philology, Visuality Studies, Political Science, Understanding the Two Cultures - Natural and Human Sciences, Addressing the Pedagogical and Intellectual Divide (10 lectures)

Culture and Contemporary Life*:* Mapping the City, Urban Lives and Cultures, Knowledge Society, Technology, Precarity, Virtuality, Representation and Alternate Realities, Culture and Big Data (11 lectures)

Text Books

1. Simon During. 1993. *The Cultural Studies Reader*. London: Routledge.

Title	**Time and Literary Narratives**	Number	LAL7XXX
Department	School of Liberal Arts	Structure (L-T-P-C)	3-0-0[3]
Offered for	Ph.D. (Cr>=0); M.Sc. (Cr >=30); M.Tech. (Cr>=0); B.Tech. (Cr>=100)	Type	Elective
Prerequisite	None		

Objectives:

The course aims to engage with the concept of time in relation to literary narratives. The course will examine how literary texts narrativize time and the experience of time; how philosophical notions of temporality get reflected and reimagined in literary narratives; how the notion of linear progressive time is critiqued by twentieth-century literary and cultural theories. During the course selected literary texts will also be analysed to have a critical understanding of the concept.

Learning Outcomes:

1. The course will enable students to analyse and think critically about different representations of time in various literary movements across cultures.
2. The course will enable students to understand and reflect on the concepts of temporality in literary and cultural theory.

Contents:

Fractal I

Concept of Narrative and Time (13 sessions)

Narrative, narrative time, order, duration, representation of time in different literary forms, chronotopes, time-space frame, lyrical time, and novelistic time.

Fractal II

Debates of Temporality in the 20th century (13 Sessions)

I. Modernity, memory and time, life in a day, psychological time, boredom.
II. The idea of the present, the end of temporality, “timeless time” in the age of information.

Fractal III

Debates of Temporality in Gender and Postcolonial Studies (13 Sessions)

I. Temporality and feminist movements, body and time, “women’s time”, “queer time”, alternative temporalities.
II. Critique of linear historical time in postcolonial studies, nation, history and time, vernacular time, “double time”.

Course Title	**Digital Cinema**	Course No.	LAL7xx0
Department	SoLA	Structure (L-T-P[C])	3-0-0 [3]
Offered for	Ph.D. (Cr>=0); M.Sc. (Cr >=30); M.Tech. (Cr>=0); B.Tech. (Cr>=100)	Type	Elective
Prerequisite	None		

Objectives

1. Help in exploring various democratic possibilities offered by digital cinema
2. Create an understanding of the digital in the domain of exhibition and spectatorship
3. Create an understanding of the digital platforms for cinema-visual art collaborations

Learning Outcomes

1. Sustain an interest in digital cinema, its liberating principles and politics
2. Develop an informed acquaintance with the experimental cinema-visual art alliance in the days of the digital
3. Understand the implications of the digital for non-industrial film forms

Contents

The End/Future of Celluloid: Concepts and historical debates, introducing digital, post-cinema as a concept (9 lectures)
Digital Cinema and Durational Principles: Durational principle in the days of the digital, slow cinema as a concept and resultant debates (12 lectures)
Spectatorship and Authorship: streaming platforms and authorship debates, new festivals and exhibition spaces, screen dynamics and high definition image, emergent forms of spectatorship
(12 lectures)
Emergent Forms: digital film archives and databases, experimental cinema, visual art, and the digital, the politics of the digital (6 lectures)

Text Books

1. Koch, G., Pantenburg, V., and Rothohler, S., (eds.) (2012), *Screen Dynamics: Mapping the Borders of Cinema*, Austrian Film Museum.
2. Torlasco, D., (2013), *The Heretical Archive: Digital Memory at the End of Film*, University of Minnesota Press.
3. Denson, S., and Leyda, J., (2016), *Post-Cinema: Theorizing 21st-Century Film*, Reframe Books.

Title	**Masculinities in the Global South**	Number	LAL7xxx
Department	SoLA	L-T-P [C]	3-0-0 [3]
Offered for	UG and PhD	Type	Elective
Prerequisite	None		

Objectives

The Instructor will:

1. Introduce students to the societal structures and expectations through which the gendered individual emerges as an integrated physiological, psychological, and socio-political being
2. Locate how the postcolonial nation state and masculine behaviours intersect in the Global South through in-depth case studies and analysis of policy reports as well as cultural artifacts related to current environments, health, family, relationships, and aging
3. Critically examine masculine expectations and behaviors in contemporary society, with a specific focus on India

Learning Outcomes

The students are expected to have the ability to:

1. To understand the broad field of Masculinity Studies and the construction of masculinities in sports, family, work and other social relationships
2. Examine the concepts underlying heteropatriarchal assumptions about masculinity and the various gendered experiences of the male body
3. By the end of the course, students will develop the capacity to understand and develop rational frameworks for the varied contexts of hegemonic, hyper and hypo-masculinities in diverse social and professional contexts

Contents

The Phenomenology and Materiality of Bodies: Introduction to power, essence, embodiment and volatility in relation to gendered bodies through the works of Merleau-Ponty, Foucault, Irigaray, Cixous, de Beauvoir, Fuss and Grosz (6 lectures)

Gender and Performativity: Locating through the works of Butler, Halberstam, Bordo and Douglas how gendered behaviour and sexual identity differ, intersect and create dissonances based within the specificities of our geographical and social positions (6 lectures)

Bodies, Spaces and Borders*:* Examine how gendered bodies are performed and determined within the determining variables of spatial contexts and bordered zones. (6 lectures)

Men, manhood and masculinities*:* Tracing the historical and social constructions of hegemonic, hypo/hyper masculinities in various local, regional and national contexts. *(6 lectures)*

Mediations, Violence and Manhood Examining the intrinsic role of violence in the construction of dominant masculinities especially in postcolonial spaces and the role of the media in legitimizing such constructions of manhood. (7 lectures)

Digital masculinities and its Discontents**:** Deciphering how digital spaces configure new forms of masculinities and its effects on both online and offline spaces. (8 lectures)

Textbook:

1. Connell, R. W. (2009). Masculinities. Polity Press.
2. Dasgupta, R. K. (2014). Masculinity and its challenges in India: essays on changing perceptions

Course Title	**Arts & Aesthetics**	Course No.	LAL7XXX
Department	SoLA	L-T-P[C]	3-0-0 [3]
Offered for	B.Tech. (Cr>=100); M.Sc. (Cr >=30); M.Tech. (Cr.>0); Ph.D. (Cr.>0)	Type	Elective
Pre-requisite	None		

Objectives

1. Examine closely key aesthetic theories from Indian and Western traditions of analysing art.
2. Introduce and explain theories of performance analysis across aspects of textuality, embodiment, ritual, acting, movement, sound, music, performativity, and adaptation.
3. Study film theory, history, modes of criticism and research methods in contemporary cinema and media studies.
4. Develop a comparative understanding of the forms and aesthetic theories of visual art, cinema, new media, and performance.

Learning Outcomes

1. Ability to apply theoretical frameworks such as semiotics, phenomenology, and classical aesthetic principles to analyze historical, modern, and contemporary art forms.
2. Knowledge of major film theories, modes of criticism, methodologies in Film Studies and developing ability to use them for analysis.
3. Knowledge of methodological approaches pertaining to the discipline of performance studies.
4. Capacity to analyze multimedia art forms incorporating elements of visual art, cinema, new media and performance using interdisciplinary methodologies.

Contents

Showing Seeing: Theories of Visual Art:
a) Indian and Western theories of art and aesthetics: *Natya Shastra*, *Dhvanyaloka*, *Abhinavabharati, mimesis, catharsis* b) Theories of Representation and Semiotics, Phenomenology c) Modern and Contemporary art: Art Schools: Madras, Calcutta, Bombay, Ravi Varma and academic realism, Nationalist art: Bengal School and Abanindranath Tagore, Santiniketan School, Feminist Art, Comic Studies, and New Media Art. **(13 lectures)**

Showing Show and Tell: Cinema and Media Studies:
a) Fundamentals of cinema (apparatus, modes of representation, color, sound, time and space), b) Film Theory (classical and post-classical) c) Film history (Early cinema, major movements in world cinema, Indian cinema histories, transnational cinema) (5 lectures), d) New Media studies, e) Theatre-cinema interface, artist films & experimental cinema. **(13 lectures)**

Showing Doing: Performance Studies:
a) Defining Performance in the indian/Western context, Performativity and Performance Studies b) Ritual and Play c) Psycho-Physical Approaches to Acting d) Theories of Sound and Movement e) Politics of Adaptation and Intercultural Performance f) Performance and Socio-Political Efficacy g) Performance Art: intersections of performance, art, cinema and new media **(13 lectures)**
