Agenda

Curriculam Structure

of

second year

in

full-time MBA and MBA-Technology Program

School of Management and Entrepreneurship, IIT Jodhpur

Background

SME decided to make all courses to three credits in its two-year campus based full time MBA and MBA-Tech in the year 2025. The first year's curriculum structure was **simplified** with all graded courses modified and converted to 3 credits each. These courses were approved by the Senate last year and has been implemented for the batch of 2025-2027. Structure of second year needs to be changed in light of the new 1st year curriculum and because of fact that all our electives are now of 3 credits. School Faculty Board (SFB) deliberated on the ***simplified*** credit structure of the second year and recommended new curriculum structure in the SFB meeting dated 20th April 2026. The matter was subsequently discussed in the SPGC meeting conducted on 19th May 2026.

The **philosophy** underlying change in structure is explained through following table:

Curriculum Structure	Before	Now	Remarks
Total Graded courses in 2nd year	13 (generally 2 credit electives courses)	10 (all are **standardized to 3 credit** electives)	Many electives were merged and some redundant or overlapping electives were dropped)
Total Graded credits in 2nd year	26	30	An increase by a small margin due to increase in credits per course. Rationalized as far as possible
Total Graded courses in 1st year **(already approved in Senate last year)**	20 (2 and 1 credit courses)	14 (all 3 credit courses)	Similar Core courses belonging to same functional domain were merged
Total Graded credits in 1st year	37	42	An increase by a small margin due to increase in credits per course. Rationalized as far as possible keeping functional representation intact
Total Non-graded credits	11	5	Redundant courses were dropped and the important ones were merged to graded courses. Only communication courses and internship are retained.
Compulsory Audit courses (non-graded)	2 courses of 1 credit each	Nil	Merged with Tech MBA courses
Total Credits (Graded and Non-graded)	**79**	**80**	Total credit (and hourly) load benchmarked to IIMs, b-schools in IITs, universities abroad and accreditation agencies

Existing Credit Structure of First year (already approved and implemented)

22 credits per semester * 2 = 44 credits of core courses

(42 Graded and 2 Non-graded credits) in two semesters (refer annexure)

Second year Credit Structure

In the second year, students will opt for program electives (PE) offered by SME. In total, students need to complete 30 credits of program electives, preferably distributed as 18 credits in third semester and 12 credits in the fourth semester. In addition, students in 3rd semester will register for Summer Internship of 3 non-graded credits to account for internship done during the summer term. In the final semester, students need to undertake a Project (of 3 credits) under the supervision of a faculty member. This is mandatory requirement to complete the program.

Table 1: Credit Structure in second year

Semester	Number of Courses	Nature of Course	Credits	Credits per sem
3	6 Electives	Graded	18	21
	MBA Summer Internship	Non-Graded	3	
4	4 Electives	Graded	12	15
	MBA Project	Graded	3	
Total **Graded** credits in second year			33	
Total credits (Graded and Non-graded) in second year			36	

Majors in a functional area

Majors in a functional domain will be recognized when a student completes 15 credits of electives in second year across third and fourth semester from one domain such as Marketing, Finance and so on. Every year, SME will list domains available for doing Majors based on faculty resources. Core courses credited in first year will ***not*** be counted for Majors specialization.

Credit structure for MBA-Tech Program

15 credits out of 30 credits of electives across two semesters need to be taken by students from the following list of courses to qualify for degree requirements of MBA-tech Program.

Table 3: List of Program Electives for MBA-Tech Program

S.No.	Name of the courses *	Credits
1	Artificial Intelligence in Business	3
2	Business Storytelling with Data Visualization and Machine Learning	3
3	Big Data & Cloud Computing	3
4	Introduction to FinTech	3
5	Industry 5.0: Driving Digital Transformation	3
6	Digital Business Models	3
7	Supply Chain Analytics	3
8	Data Protection and Information Security	3
9	Human-AI Collaboration at Work	3
10	Digital Marketing Analytics & Optimization	3
11	Technology Leadership	3
12	Deep Learning Applications for Business	3

** It is not necessary that School floats all these electives. Courses will be floated based on availability of faculty resources. In addition, these courses will be floated across two semesters, some in semester starting in August and others in January semester.*

In addition to 15 credits of Tech electives, students can do the remaining 15 credits through any of the electives offered by SME. If these remaining 15 credits of electives belong to a particular functional domain, then Majors in that functional domain will be recognized. This allows for the possibility of doing functional specialization within the MBA-Tech degree as well.

Annexure: Curriculum and credit structure of first year (Already approved)

S No	Semester 1	Course Type	Credits	L-T-P	Semester 2	Course Type	Credits	L-T-P
1	Fundamentals in Accounting	PC	3	3-0-0	New Venture Planning	PC	3	3-0-0
2	Business Economics-I	PC	3	3-0-0	Business Economics-II	PC	3	3-0-0
3	Business Statistics	PC	3	3-0-0	Digital Enterprise Management	PC	3	3-0-0
4	Corporate Finance	PC	3	3-0-0	Strategic Management	PC	3	3-0-0
5	Fundamentals of Marketing	PC	3	3-0-0	Marketing Frameworks and Practice	PC	3	3-0-0
6	Human Behavior and Organization Dynamics	PC	3	3-0-0	Legal and Taxation Aspects of Business	PC	3	3-0-0
7	Operations Research for Managers	PC	3	3-0-0	Introduction to Operations Management	PC	3	3-0-0
8	Business Communication	NG	1	0-0-2	Corporate Communication	NG	1	0-0-2
Total Graded credits in the semester			21		Total Graded credits in the sem		21	
Total Credits (Graded & Non-graded)			22		Total Credits (Graded & Nongraded)		22	
Total Credits in the first year of MBA and MBA-Tech (42 + 2 NG)							**44**
